

TRAD LADDER GUARD

Built for safer, more secure ladder access.

The TRAD Universal Ladder Guard is designed to help prevent unauthorised access to site ladders and scaffold structures, improving safety on live sites. Developed in-house by TRAD UK, it provides a practical and reliable solution for traditional steel scaffold ladders, system scaffold trap-decks, and permanent roof ladder access points.

Built to fit different ladder widths and rung spacings, the Universal Ladder Guard removes the need for multiple guard types. Complete with durable BZP and powder-coated protection, plus a stainless steel padlock, it delivers a safer, more flexible approach to ladder security.

FEATURES & BENEFITS

- ✓ Helps prevent unauthorised ladder access
- ✓ Fits different ladder widths
- ✓ Adjustable to varying rung spacings
- ✓ Suitable for scaffold ladders and trap-decks
- ✓ Stainless steel padlock included
- ✓ Front or rear locking option
- ✓ Durable BZP and powder-coated finish
- ✓ No chains required
- ✓ Conforms to HSE Safety Bulletin CON1 – 2018
