NAME OF COMPANY: Independent Access Inspection Group		
COMPANY WEBSITE:		www.iainspections.co.uk
1.		
1.	What services/products does your company provide? ( <i>Please use bullet points if more than one</i> ). We provide several pro-active services to NASC members and scaffold companies of all sizes. These	
	<ul> <li>include an innovative bespoke scaffold inspection application that enhances the professionalism safety, and reputation of all stakeholders within the scaffold industry.</li> <li>The principal service we provide is the competent inspection of scaffolds and other temporary work. This service is available to all types of employing organisations and all sizes of scaffold contractors. A sample of other services we provide include,</li> <li>Pro-active advice to employing organisations at the pre-construction and tender stage. This we include selecting competent scaffold contractors (NASC members are always promoted) are suitable scaffold systems for the relevant structure.</li> <li>Checking all categories of temporary works designs for clients and contractors.</li> <li>Emergency inspections and support following adverse incidents such as a vehicle striking a scaffold or severe adverse weather that could have compromised the stability of a scaffold.</li> </ul>	
2.	What benefit do these services/products provide to scaffolding contractors?  Although the products and services our Independent Access Inspection Group provide fall outside the remit of the NASC design or supplier category of membership, we are very proud of our Ancillary Service NASC membership. We consider ourselves as an integral member of the NASC. We believe our professional services bring numerous benefits to all parties, especially NASC members who want to ensure continual improvement with the delivery of their product.  A sample of the benefits our services bring to scaffolding contractors include,	
	accordance with the applicable TG2 industry best practice.	s and clients that the structure has been built in 20:21/ bespoke designs, NASC guidelines and d contractors of all sizes at the workface
		vanced scaffold inspectors to advise and update
		old contractors maintain high standards. This horities such as the HSE that due regard is being oples wellbeing.
	we always disseminate lessons lear contractors.	and a diverse portfolio of scaffold contractors, nt and innovations to all sizes of scaffold
3.	Why do you feel the services/products that your company provides should receive special recognition from NASC members?	
	Our services and industry leading inspection app can form the foundation of a successful scaffolding project for NASC members. Scaffold contractors who engage with us give the wider construction industry confidence that that structures are being properly inspected without fear nor favour.	

Other reasons we hope will merit special recognition include,

## **NASC AWARDS 2023**

- We are often an integral link between various clients, including PCs and scaffold contractors. We constantly promote the benefits of employing NASC members.
- We offer NASC members pro-active advice, construction phase engagement and solutions rather than just issuing reports to clients that could harm reputations.
- Our inspections are conducted by experienced former scaffolders who hold advanced CISRS cards. They engage and mentor young scaffolders while explaining where an adverse issue with a structure has been identified. This understanding and relationship is sometimes absent when general H&S advisors inspect scaffolds.
- Our comprehensive inspections could contribute to a civil or legal defence should there be a major adverse occurrence. Following initial inspections of NASC member erected scaffolds, many of the faults identified are those attributed to overloading working platforms or interference with critical aspects of a scaffold such as the removal of ties by unauthorised persons.
- Our inspection reports and the app are tools that help reduce stress on extremely busy scaffold workers and client's managers. They deliver timely, user friendly, statutory information to all parties. The time they save and the responsibilities they help to fulfil for various CDM duty holders are rarely recognised.
