

SCAFFOLDING ANCILLARY SERVICE OF THE YEAR AWARD

NAME OF COMPANY:	ScaffFloat
COMPANY WEBSITE:	www.scafffloat.co.uk
1.	What services/products does your company provide? <i>(Please use bullet points if more than one).</i>
	<ul style="list-style-type: none"> • We make and hire pontoons made from standard scaffold. Built using our patented plastic floats which are compatible with standard 450mm and 750mm beams. • We use these pontoons to provide safe floating access on the water. • We are a UK start up that has now delivered over 5,000 hours of access since we started. • The majority of our ScaffFloats now include self propulsion and operate with one of our skippers.
2.	What benefit do these services/products provide to scaffolding contractors?
	<ul style="list-style-type: none"> • They are strong, stable, and extremely safe platforms to work from. • Their versatility means they provide a very wide range of floating solutions to fit the jobs requirements. • Stability: All ScaffFloat hires come with a stability board and assessment by our Naval Architect. • Certified: Approved by the MCA, PLA, EA, CRT, Royal Navy and other organisations and inline with MGN 469. • Operating Limits: Categorized waters A,B,C & D and nearshore where appropriate. • Temporary Works Certification: For larger projects we can provide a CAT 3 check under temporary works legislation and a certificate of conformity to relevant class and Eurocode standards. • Edge Protection: As standard, pontoons come with solid handrails and kick boards compliant with TG20. • Bolt Ons: As well as the ponton we provide a wide range of bolt ons including: <ul style="list-style-type: none"> ○ Engine pods and console ○ Spud legs ○ Deck winch ○ Heavy Duty Cleats ○ Lifting: Hiab style cranes, gantries and a-frames ○ Windlass Pod ○ Launch Wheels ○ Moon Pool • Ballasting: The floats can also be filled with water through fitting in the float, allowing them to be used for sub sea lifting. See floating dry dock demo.
3.	Why do you feel the services/products that your company provides should receive special recognition from NASC members?
	<ul style="list-style-type: none"> • ScaffFloat is an innovative solution that has never been done before. • Also being such a simple and versatile system, the product is constantly innovating and morphing in what it is capable of.

NASC AWARDS 2023

	<ul style="list-style-type: none">• We have unparalleled experience in creating innovative solutions to sometimes very complex maritime issues.• Our business model is hire only - so we can control design, application and manage risk.• We are environmentally sustainable as the floats are 100% recyclable.• When they reach the end of their life we shred them and use them to make new floats.• We are also operating globally with floats in Australia, Bahrain, Cyprus and Malta with numerous international discussions taking place. The floats are compatible with all the main global scaffold beam manufacturers.
