

SCAFFOLDING ANCILLARY SERVICE OF THE YEAR AWARD

NAME OF COMPANY:	CADS Ltd T/A SMART Scaffolder
COMPANY WEBSITE:	www.smartscaffolder.com
1.	What services/products does your company provide? <i>(Please use bullet points if more than one).</i>
	<p>The SMART Scaffolder range of Software products aimed at increasing productivity and compliance for Scaffold Contractors</p> <ul style="list-style-type: none"> • SMART Estimator • SMART Manager, SMART Inspector and SMART Handover • SMART Calculations • SMART Scaffolder for Revit
2.	What benefit do these services/products provide to scaffolding contractors?
	<p>SMART Estimator software uses 3D modelling and BIM Integration to allow for accurate and precise estimating of materials, increasing efficiency. This software also allows for visualisation of the scaffold design in 3D, which can help with identifying any potential issues or hazards before construction begins. Additionally, the software's user-friendly interface allows contractors to easily create and store professional quotations, reducing the need for time-consuming manual calculations and quoting. Finally, the SMART Estimator software can improve profitability by providing a clearer picture of project costs, enabling users to make more informed pricing decisions. Overall, SMART Estimator software offers significant benefits for scaffold contractors, helping them to streamline their estimating process and improve their bottom line.</p> <p>SMART Manager is a cloud based solution designed to help scaffold contractors improve their site work processes and increase productivity. With the ability to produce digital handovers and inspections. Reducing errors, improving safety, increasing efficiency and speeding up the inspection process, and improving communication and collaboration between staff and clients.</p> <p>By switching to Digital documents Scaffold firms can move towards a net zero future, last year SMART Manager users produced over 500,000 reports digitally, according to 8billiontrees.com 100,000 sheets of paper require approximately 8 trees and release 6 tonnes of carbon dioxide from manufacture, transport and landfill. Meaning our users saved over 40 trees and 30 tonnes of Co2, that's roughly 216,000 miles of driving an average car!</p>
3.	Why do you feel the services/products that your company provides should receive special recognition from NASC members?
	<p>At SMART Scaffolder we strive to create intelligent software for scaffold contractors that promotes increased productivity, profitability and sustainability. As well as giving our clients a competitive edge when tendering to win more work and grow their business. In addition to this our range of mobile apps allows our clients to provide a more professional and accountable approach to ensuring their site work is compliant through digital handovers and 7 day inspections. Ensuring safety critical documents are completed, distributed and stored correctly.</p> <p>We aim to give our users more control over their data and allow their business to benefit for data analysis of their current workflows to work smarter and safer.</p>
